Combined Water Boiler and Chiller

- Automatic fill combined water boiler and chiller made in England by Lincat
- High hourly output: 12 litres chilled, 28 litres hot water
- Low maintenance and energy costs
- Touchscreen operation with timer and eco functions
- Narrow footprint: only 250mm wide
- Uses standard 13 amp electrical socket
- Fully programmable with large touch screen display
- Push button dispense
- Easy-fit replacement filters will supply approximately 1500 litres of purified water
- Easy to clean and descale: no engineer required, just follow on-screen instructions
- Hot water temperature adjustable between 70°C and 98°C
